

SILMO D'OR FOR NIDEK TECHNOLOGY

The Silmo d'Or 2009 for Eye Test Equipment has been awarded to Nidek for its ARK 560A autorefractor/keratometer which features innovative VA measuring technology.

Offering highly accurate refraction, the Nidek technology uses a new measuring principle: Pupil Zone Imaging, which analyses a wider area to obtain more reliable and realistic data. Standard for Nidek equipment, it also includes 3D auto tracking and shooting.
